

Underwater GPS and WiFi

WATER  LINKED

Din link til havrommet

Water Linked

Founded in 2013

Consultancy company spin-off

Module/technology supplier

Background

No GPS or WiFi
under water

Challenging to communicate
Challenging to locate

The ocean becomes inaccessible
Underwater operations becomes limited

What does no WiFi mean?

«All sensors
need cables»

«All ROVs
need tethers»

Cables =
CAPEX & OPEX

What does no GPS mean?

No autonomous revolution

Our technology

Extremely robust

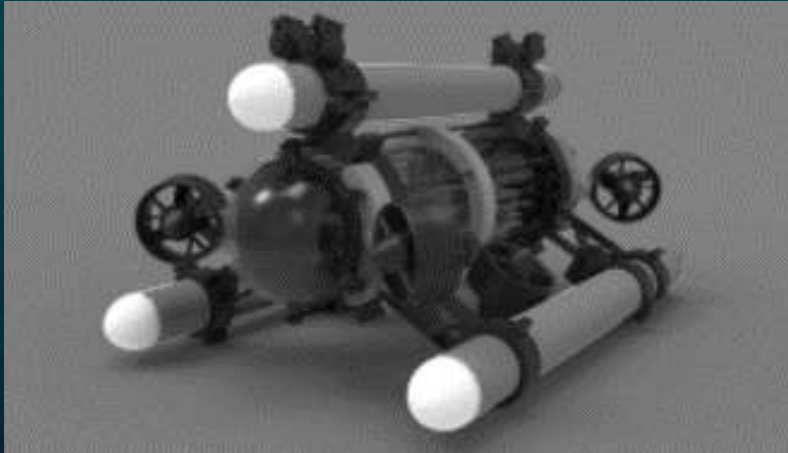

High data-rate potential

Small

Cheap

Demo

Wireless ROV

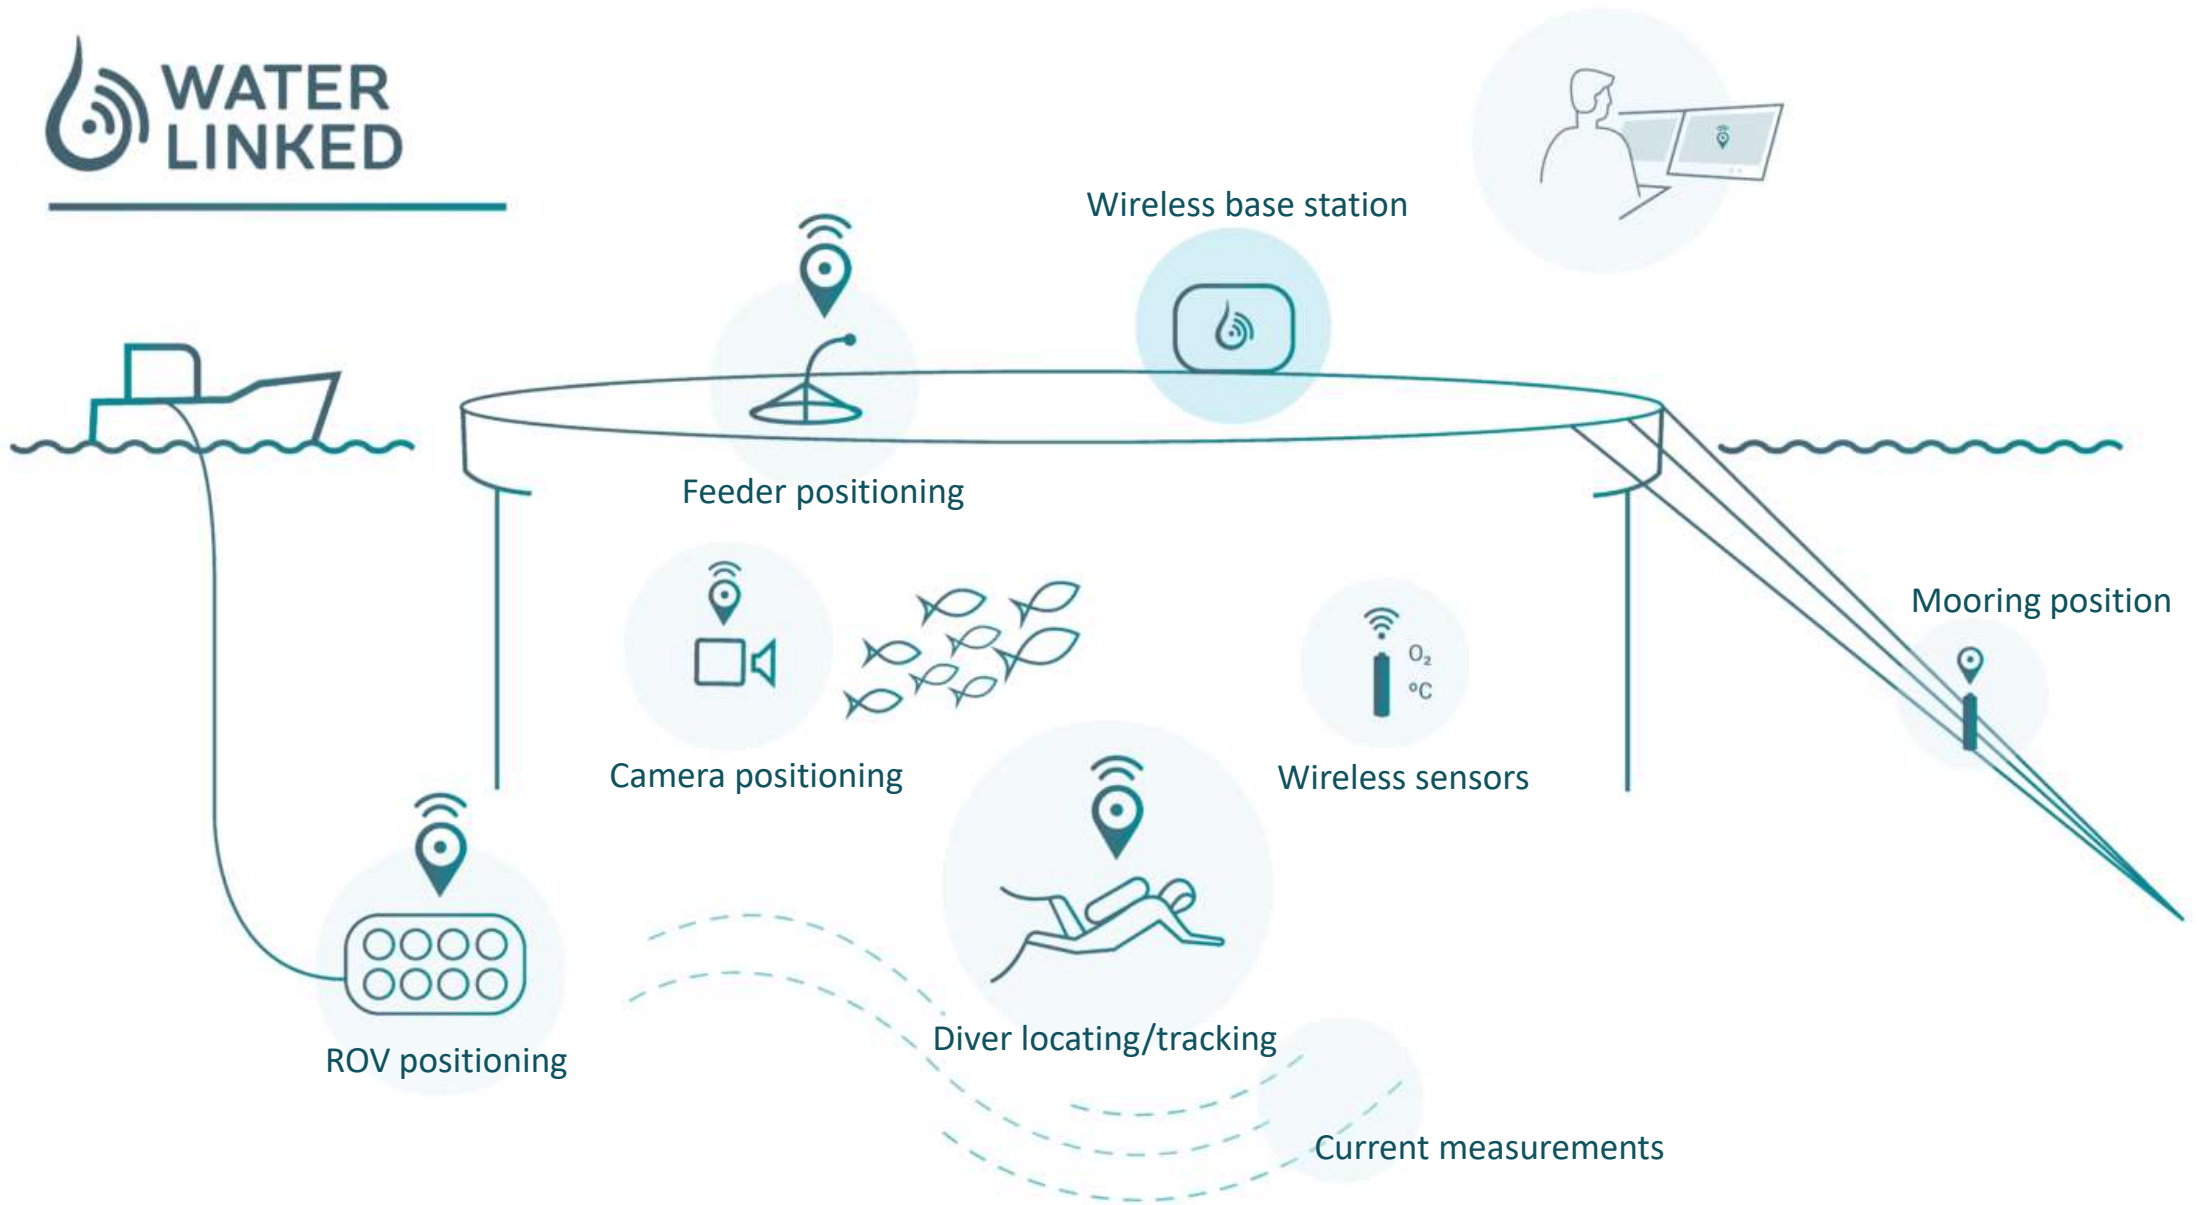

Underwater GPS

Stand B-123

Skansen (AKVA Group)

What is the potential in aquaculture?

Thank you
