

# How to reach IMO 2050 targets

- A revised IMO GHG Strategy will be adopted in 2023. Note that this may lead to strengthened ambitions.
- There is already several proposals for IMO measures on the table. These proposed measures will be negotiated according a agreed work plan.
- It is possible to achieve the agreed ambitions through 1) strict technical and operational measures, 2) market-based measures, or through 3) a combination
- A fuel transition is needed
- Increased investments in production of sustainable zero carbon fuels, fuel infrastructure and vessels designed to use such fuels
