

Nye forretningsmuligheter på tvers av bransjer

GCE Ocean Technology – Møteforum 2. des 2021

Terje Weisser – Manager SI, CGG Norway

cgg.com

1931 – 2021: A 90 years journey

OUR STRENGTHS

Remarkable data & technology

Leading the industry in advanced imaging and geoscience & digital technologies

Outstanding people & performance

Ingenuity and expertise driving innovation and exceeding expectations

Resolute ESG commitments & new solutions

Enabling our clients to be more efficient, effective, responsible and sustainable.

THREE CORE BUSINESSES

Geoscience

Established leader in subsurface imaging, geology, geoscience software and services

Multi-client

The industry's most technically advanced seismic data and geologic studies in the world's key locations

Equipment

Established leader in marine, land, ocean floor and downhole seismic equipment and gauges

Our Geoscience Ecosystem

Subsurface Imaging

Advanced imaging and inversion of all seismic data types

Geology

Leading edge geological data, analytics and insights

Reservoir Development

Integrated reservoir development & engineering technology & services

Satellite Mapping

Optical, radar & elevation data, delivering insights from space

Multiphysics

Advanced software & services in gravity, magnetics & electro-magnetics

Digital Services

Cloud, HPC, SaaS, AI & Machine Learning across geoscience

Data Hub

Digital transformation and data management solutions

While the O&G industry has been active in Clean Energy for decades, it is now in full transition, with a focus on three key areas

Setting internal
ESG plans forward

Ensuring sustainability
of core business

Developing new areas
for business growth

While the O&G industry has been active in Clean Energy for decades, it is now in full transition, with a focus on three key areas

Setting internal
ESG plans forward

*Move into
adjacent areas*

Ensuring sustainability
of core business

*Follow your
clients*

**Develop new areas for
business growth**

*Leverage core
capabilities*

Leveraging expertise for new opportunities

Geoscience – Technical Disciplines

Subsurface
Imaging

Reservoir
Development

Multiphysics

Geology

Earth
Observation

Digital
Services

Geoscience - Energy Transition & Environment Disciplines

Minerals &
Mining

Geothermal
Science

CCS &
Energy Storage

Environmental
Science

Marine Minerals

CGG is uniquely positioned to support the discovery, targeting and environmentally conscious recovery of marine (and terrestrial) mineral resources:

- Multi-scale exploration of resource & associated mineral insights
- Environmental due diligence
- Provision of high-end and reliable equipment and sensor technologies

Environmental Science

Nature-based Solutions

Identification,
optimisation &
subsequent
monitoring of nature-
based carbon offset

Marine resources

Integration of
environmental &
geotechnical data to
reduce risk

ESG

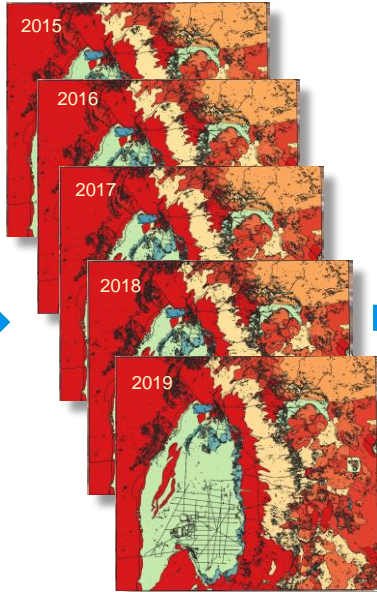

Monitoring the impact of
infrastructure or specific
human activity on the
environment

Environmental Science leverages CGG's HPC & AI lab capabilities and earth science expertise to provide data analytics driven intelligence to mitigate environmental risks

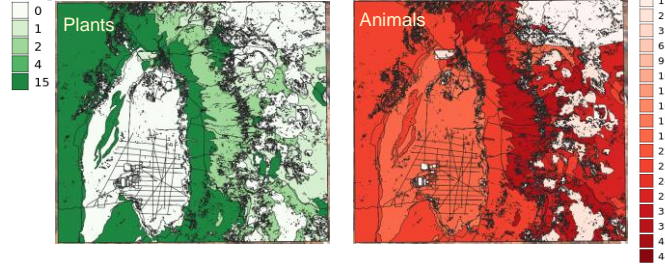

Monitoring Natural Capital by creating a biodiversity index

Multiple
data

Habitats

Species

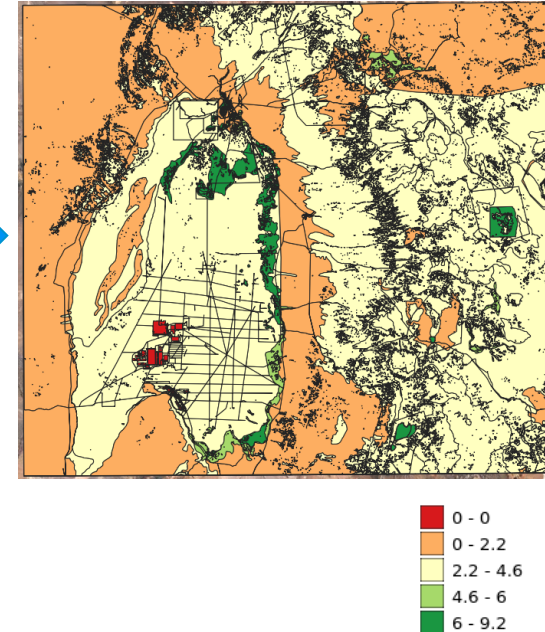

Protection

Distinctiveness

Dynamic Biodiversity Index

Biodiversity Index: time-lapse

Change in Biodiversity Index Score 2015 - 2019

Using CGG data science & machine-learning capability for Benthic data analysis

How can we develop new areas for business growth?

Collaboration, collaboration, collaboration!

Thank you!
